Detailed Telemetry

Real-time, comprehensive cloud based telemetry allowing you to monitor and control your fleet... wherever you are

Vending Telemetry • Online Management
Inventory Control • Instant Alerts • Cash Control
Route Planning • Remote Machine Configuration
Sales Reporting • Stock Level Tracking • Technical Monitoring

- 1 Customer selects product and presents their card for payment (swipe / tap or chip insert)
- 2 Transaction is sent to the CAS payment gateway for processing
- 3 Transaction data is encrypted & submitted to the acquiring bank for real time authorisation
- 4 Response is sent to machine and if approved, product is dispensed
- 5 Real time transaction and settlement reporting available via the CAS Gateway merchant portal in addition to detailed telemetry, stock information, etc from the vending management system.
- 6 Funds deposited straight into your bank account
